AVHub

Yealink AVHub Noir:

Yealink AVHub est un processeur audio et vidéo de réunion utilisé dans les grandes/extra grandes salles de conférence/champs de conférence. L'AVHub prend en charge plusieurs caméras, plusieurs microphones et plusieurs haut-parleurs. Combiné à la capacité de traitement audio et vidéo, l'AVHub peut améliorer les performances du PC. En outre, les caméras, les microphones et les haut-parleurs peuvent être directement connectés à l'AVHub par l'intermédiaire du câble réseau PoE, ce qui permet de réduire le câblage et de gérer uniformément les équipements vidéo et audio. Les utilisateurs peuvent ajuster la disposition des caméras avec le plug-in Yealink avant ou même pendant les réunions MTR lorsqu'ils utilisent l'AVHub.
